

*hi!*

To get the most out of this product, I recommend giving your other potent treatments a break. (No retinols or retinoids please!)

This probably goes without saying, but if your skin is already in a confused state (i.e., sunburn, redness or sensitized areas) wait until things are on the calm side before using T.L.C. Sukari Babyfacial™. You've made the investment and I want you to get the maximum results.

Okay...now go have your cells knocked off! Top it off with our pure Virgin Marula Luxury Facial Oil and we think you'll have a very satisfied glow.
