

# T.L.C. Sukari Babyfacial™

it'll knock your  
cells off!

A pro-quality **25% AHA / 2% BHA** at-home "facial" that gently but efficiently exfoliates the pore lining and gets rid of built-up dead skin cells. Skin's texture is smoother and baby-soft with a youthful-looking radiance.

*tip:*

Glycolic acids often get a bad rap for being irritating, but we believe that it's the pH level and accompanying ingredients that can be the real problem. We formulated at an ideal pH level of 3.5 with a blend of acids that work synergistically to make Babyfacial™ more effective without harsh side effects.
