

the glamour app

MDSolarSciences™ sun care products are perfect for every day application. These amazing formulas fit flawlessly into your beauty and grooming routine.

You no longer have to sacrifice luxury in your quest for healthy skin.

the glamour app
for body

The GLAMOUR app helps to:

- Ensure proper application for face and body
- Demonstrate how easy it is to incorporate daily sun care into your beauty and grooming routine
- Keep you looking great & sun safe

Generously

Use enough! The American Academy of Dermatology says most people only apply 25-50% of the recommended amount.

Look

Watch yourself in a mirror during application, taking care to apply evenly and hit those easy-to-miss spots like the hairline and neck.

At least

Sunscreen should be applied at least 15 minutes before sun exposure.

Massage

Gently massage product on skin to ensure proper blending and even application.

Over make-up

Apply over make-up as the perfect finishing touch or for reapplication during the day.

Under make-up

Sun care formulas that offer a matte finish are a great primer for foundation.

Re-apply

Remember to re-apply at least every 2 hours and immediately after swimming, sweating or towel drying.

The GLAMOUR app is also a great way to keep your entire body sun safe! Map out sun care formula on all sun exposed areas, such as arms, legs or torso, and blend to ensure full coverage!
