

SPF, TWO WAYS

CLEAN CHEMICAL SPF

These actives absorb UV light (so your skin doesn't)...

and they allow for weightless, sometimes clear formulas. We love them for every day, working out or beaching it.

Some of our faves...

A totally invisible primer that gives you the freedom to create any type of look.

Our original, oxybenzone-free formula that you can use every day, for face & body.

A refreshing, hands-free way to reapply your SPF throughout the day.

FUN FACT:

We've never used Oxybenzone (a chemical sunscreen active with a really bad rap) in any of our formulas.

100% MINERAL SPF

These actives are made up of tiny white, UV-protecting particles...

and are more gentle and less likely to cause irritation. We love them for anyone with sensitive skin or melasma.

Some of our faves...

A tinted primer that blurs pores and mattifies skin. (It's like your skin, but better.)

A blendable formula that gives you fresh, natural coverage (perfect for the workweek).

A mattifying, hands-free way to reapply your SPF throughout the day.

FUN FACT:

Our mineral formulas are blendable and feel-good... and fit easily into your daily beauty routine.
