

# UNSEEN VS. MATTE SCREEN

This fall, we have two great ways for you to get your SPF fix...  
Unseen Sunscreen and 100% Mineral Matte Screen.

## Here's how they're alike...

Both act as SPF base layers

Both prime skin for your makeup  
(or no-makeup) routine

Both have ingredients that help protect  
from blue light from your phone and computer

## Here's how they're different...

### OUR KIND OF DISAPPEARING ACT.

Completely invisible

Has a slightly glowy effect

Gives you the freedom to  
achieve any type of look

### YOUR PERFECT LOOK, MATTIFIED.

Has a universal tint

Blurs pores & reduces shine

Creates the perfect  
matte canvas
