

THE 3-DAY BENDER

HOW TO GET CURLS

drybar®

3-DAY BENDER CURLING IRON

Rotating clamp makes curling hair quick and easy.
Ionic technology improves the condition of the hair by increasing shine and reducing frizz.

STEP 1 : Dual ceramic heaters create even heat within 60 seconds. Digital temperature control allows for custom styling on all hair types (440°F/226°C).

STEP 2 : Starting in the front, clamp where you'd like the curl to start and rotate clamp away from the face.

STEP 3 : Work in 1-2 inch sections, clamp toward the top of the root and rotate clamp away from your face until you get to the end.

STEP 4 : Continue to curl all the way around your head; for a tighter curl, stay in small sections and hold a few seconds longer.

STEP 5 : Continue curling; don't miss any sections!

STEP 6 : Voilà! Finger-comb for desired looseness of curls.

ALLI'S TIPS

For looser curls, make larger sections closer to 2 inches (5 cm), for tighter curls, make smaller sections closer to 1 inch (2.5 cm).

xx, Alli Webb
