

We Believe in Sustainable Beauty

Responsible, recyclable and reusable from top to bottom.

Our oak cap is sourced from Spain and is made of wood from certified sustainably managed forests.

Each fragrance in the collection is infused with sustainable ingredients. Several fragrances also include ECOCERT materials.

Our fragrances are manufactured in a facility that uses 100% solar energy.

The alcohol in our fragrance is derived from corn, allowing for a highly refined and pure juice. We have also incorporated aloe to our formula for added benefits and skin feel.

Glass bottle is 100% recyclable.

Our crystal clear cellophane is derived from corn, a widely accessible, renewable, natural resource. After use it can be composted and the material will break down and revert down to carbon dioxide and water.

All paper is FSC.

Bottle is contained in foam which can be re used as a protective barrier for your fragrance when travelling.

Join our eco-conscious mission and please re-use this box to store your CLEAN Reserve fragrance.

Cartons are handmade.
