## Q&A with Hannah

### What advice would you give a young woman about becoming a successful entrepreneur?

You can never make too many mistakes. You must ask as many questions as possible and network with business people. Don't be afraid of failure. You will fail at some point, however, you will learn from it and it will be extremely beneficial in the end.

### What makes you feel the most confident?

A clean face always makes me feel most confident. Confidence to me starts with your skin and what you're putting in your body. As long as you are doing right by yourself they say you glow from the inside, giving you a true sense of confidence.

"An important skin care secret for me is having green smoothies, eating vegetables, and drinking lots of water."
