

SEPHORA

Flatter yourself contouring brush set

Prep: Apply primer and foundation to entire face and neck.

Step 1: Using the **Angled blush brush**, apply bronzer or foundation that is at least 3 shades darker than your own skin color under your cheekbones, moving brush from your ear to the hollows of your cheeks. **PRO Tip:** *Suck in your cheeks to find your cheekbones, and apply bronzer below.*

Step 2: Next, use the flat top **Buffing brush** to sweep bronzer under your jaw line from ear to ear, and along your hairline. Using the **Stippling brush**, blend bronzer out and up to your temples using light, circular motions. Repeat for your jaw line and forehead to achieve soft, natural contours.

Step 3: Dip the **Angled blush brush** in your favorite powder highlighter, and sweep from just above apples of your cheeks up to your temples and down the center of your nose to highlight.

Step 4: Using the **Angled blush brush**, sweep your favorite blush shade onto the apples of your cheeks. **PRO Tip:** *To find the apples of your cheeks, smile! Apply blush at the point where your cheeks are fullest.*

Step 5: If necessary, use the **Stippling brush** to blend and soften any remaining hard lines. Refresh your look and mattify skin throughout the day with Sephora Collection cooling mint blotting papers.
