

## Full Pout? *No Doubt.*

A quick scan around at celebrities and beauty gurus and you'll notice today's biggest beauty trend: a full, pouty lip. It's no secret that voluptuous lips are one of the sexiest features a woman can possess. But how is it possible to give your lips a boost without the scary procedures or the burning formulas that cause your lips to swell by way of irritation? Luckily, GrandeLIPS is a new, gentle version packed with all the good stuff you want and nothing you don't. Here's some tips of what to look for in your favorite plumping products:

### **Proven Ingredients**

Volulip™ marine peptides and Instaplump work to increase lip volume while Hyaluronic Acid soothes and softens for sexy, supple lips.

### **Multitaskers**

Why just plump when you can improve the condition of your lips at the same time? GrandeLIPS not only enhances lip volume in just 3-5 minutes, but it also acts as a long term treatment when used twice daily for 30 days. Not to mention, lips naturally appear even larger when properly hydrated.

### **Clinical Testing**

Don't say it, prove it! Clinical testing gives you tangible figures off of which to judge a product. In a 30 day clinical study, Volulip™ was found to increase hydration 51%, volume 15%, firmness 13%, and softness 11%. Now that's #realresults.

### **All About Applicators**

Long gone are the days of sticky, stained, and unsanitary doe foot applicators (like the ones you are used to seeing in lip glosses). GrandeLIPS uses a unique silicon cushion applicator that distributes product evenly and effortlessly over the lips and is easily wiped clean for the next use.
