

SHAPE NOSE

Slim your nose by applying **SHADE** at the inner corners of your eyes, straight down both sides of your nose bridge, then blend outward. Next, apply a thin line of **LIGHT** $\frac{3}{4}$ of the way down the center of your nose to the tip, blending any visible lines.

★ **KAT'S TIP:** The key to artistry shading is to **BLEND, BLEND, BLEND!**

LIGHT to highlight
