

# CONCEALERS

To create the look of even, flawless skin, Laura turns to concealers, with specialized formulas for eyes and face. Either way, apply sparingly and build as needed, where needed. Especially under your eyes, you want to subtly brighten, but the tone should blend seamlessly with the rest of your look.

## Laura's Original Insight:

Concealer Is Key. Concealer is at the core of Laura's less-is-more approach to makeup—in fact, Secret Camouflage was her very first product. Instead of masking skin with thick foundation all over the face, Laura invented high-pigmented concealers to use for targeted coverage, leaving skin looking natural and flawless.
