# How to Care

Velour lashes are designed and handcrafted with care. Proper maintenance of your lashes will keep them looking their best while ensuring you get an average of 20+ uses per pair.

1.

## TIP 1 | BE GENTLE

Always grasp your Velour Lashes from the lash band, not the hairs, whether you are removing from the packaging or from your eyes.

## TIP 2 | REMOVE GLUE

Once there is a small build up of lash glue on the band (typically 3 - 5 uses), gently peel off excess glue using our Too Easy Lash Applicator or your fingers. Pull on the glue and not the lash band.

2.

3.

## TIP 3 | AVOID MOISTURE

To maintain longevity and quality of your lashes, never soak your lashes in water or makeup remover. Store in original packaging and away from moisture.

## TIP 4 | AVOID MASCARA

Never apply mascara to your Velour Lashes, as this can damage the quality of the hairs. If needed, apply mascara to your natural lashes before application.

4.

5.

## TIP 5 | SPOT CLEAN

Clean any makeup off your Velour Lashes with oil-free makeup remover. Using a cotton swab, gently dab and twirl as needed on affected areas of your lashes.

## TIP 6 | KEEP THE CURL

Be sure to curl the lashes before applying them on your eyes. With Velour Lashes can be curled like real lashes!
