

Personal Microderm

2016 Beauty Influencer Panel

Thirty women were selected to try PMD Personal Microderm and provide exclusive feedback after using it for eight weeks. Highlighted below are some of their testimonials.

"My skin immediately felt softer. I felt like my skincare products were really sinking into my skin and not just sitting on top. My skin feels firmer and I can't wait to see it get even better!"

"I absolutely love this product! I felt that my skin was so much softer and smoother. My makeup applied better and my skin tone seemed more even. Obsessed with it! I use it every week now."

"The tone, texture and color of my skin were more consistent. I found my skin was brighter, smoother and presented with a more 'lit from within' effect from the regular dermabrasion."

"My skin looks and feels great. I thought it looked good before. I had no idea it could improve this much!"

"I found my skin smoother, more even in tone and my makeup and skin care products were easier and more effective in application and effect."

"I saw results immediately, after just one use. The effects keep getting better. I love it!"

"I definitely found my skin was smoother. The PMD is amazing! It really does work as well as microderm in a spa. The exfoliation it offers is fantastic and definitely competes with any of the products or spa treatments I have had that are intended to achieve the same results. I love it!"

100%

Found their skin smoother and softer after using the PMD for the first time.

96%

Noticed their skin-care products absorbed better after using the PMD.
