

HOW TO USE

Towel

1. Pat hair, do not rub
2. Lean forward so your hair falls in front of your face
3. Wrap and twist the towel gently around your hair
4. Tuck the end into the back or side so it does not fall off

Turban

1. Pat hair, do not rub
2. Lean forward so your hair falls in front of your face
3. Place the end that has the button fastener at the base of your skull
4. Twist the turban gently until desired fit is achieved
5. Fasten the loop around the button

Leave-On Time

Varies based on the hair type. People with curly hair have found they don't have to leave it on for as long as others with straight hair.

Rule of thumb: Remove the towel or turban when hair feels damp
