

The Design

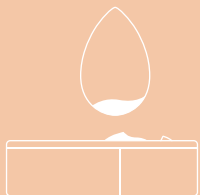

Form meets function: designed with the same consideration as the beautyblender, a special reservoir on the bottle allows anyone to apply and blend like a pro-artist.

1
First unlock pump by sliding tab beneath button to the right. Gently press button at the top of the bottle to dispense one pump of product.

2
The product flows through the angled pump into the inset reservoir.

3
The bottle now acts as a palette for easy bouncing.
