

How to: Contour & Highlight

1. Select shades 2-3 intensities deeper and 2-3 intensities lighter than your skin tone (depending on desired level of contrast)
2. Using the deeper shade, apply in the hollow of the cheeks to sculpt & define cheekbones and along the sides of the forehead near hairline to visually shorten forehead
- Using the slanted edge of concealer, apply along sides of nose to slim the nose
3. Using the lighter shade, apply directly above contour shade on cheeks, down bridge of nose and center of forehead and chin to bring light to the center of the face
4. Buff in the lighter Highlight areas first, with long back and forth strokes, then blend in the deeper Contour areas
5. Use a smaller brush to blend nose contour
6. For best results, dust on Mineral Veil® with a soft, fluffy brush
